## CAREER OBJECTIVE

Dynamic and motivated front-end developer with a keen eye for detail and a passion for crafting engaging user experiences. Proficient in HTML, CSS, JavaScript, React and responsive design techniques, I am eager to leverage my skills to contribute to innovative web projects. Seeking an entry-level role where I can collaborate with a talented team, learn, and grow in a dynamic development environment.

## PROJECTS

**Ecommerce Website**                                                                                          Link

- Built responsive and interactive web pages using React and Tailwind CSS, ensuring a dynamic user experience.
- Designed mobile-friendly interfaces with seamless functionality across all devices, from smartphones to desktops.
- Developed an intuitive cart feature, enabling users to easily add, update, and manage their products.
- Implemented light and dark theme options, offering users a personalized and accessible browsing experience.

**Music Player**                                                                                                  Link

- Developed a fully functional music player with core controls: play, pause, skip, next/previous, and adjustable volume.
- Designed an intuitive and responsive user interface with customizable themes for an enhanced user experience
- Integrated song information display, including title, artist, album artwork, and track duration.

## SKILLS SUMMARY
