## CAREER OBJECTIVE

Dynamic and detail-oriented front-end developer with a passion for creating engaging and responsive user experiences. Proficient in HTML, CSS, JavaScript, React, and modern web design techniques. Eager to contribute my skills to innovative web projects and collaborate with a talented team. Seeking an entry-level role to grow in a fast-paced development environment while continuously learning and improving.

## PROJECTS

**Ecommerce Website**                                                                                        Link

- Implemented reusable components and optimized website performance, reducing page load times by 30%.
- Developed responsive and interactive web pages using React and Tailwind CSS, enhancing user experience and driving engagement.
- Integrated modern UI/UX design principles, improving website navigation and user satisfaction.
- Designed and implemented mobile-friendly interfaces using responsive design principles, ensuring optimal viewing and functionality across all devices, from smartphones to desktops.

**Music Player**                                                                                             Link

- Developed a fully functional music player with core controls: play, pause, skip, next/previous, and adjustable volume.
- Designed an intuitive and responsive user interface with customizable themes for an enhanced user experience.
- Integrated song information display, including title, artist, album artwork, and track duration.
- Ensured compatibility across devices through responsive design techniques.

## SKILLS SUMMARY

- **Languages**    : HTML, CSS, JavaScript, Java
- **Frameworks**   : Bootstrap, Tailwind CSS
- **Library**      : React Js
- **Platform**     : Visual Studio Code, Eclipse

## EDUCATION
